BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT

Design of a new (6) bassinet Newborn Nursery to compliment a recently renovated Maternal Child Unit and a partial renovation of the C-Section suite, both located on the Third Floor of the hospital. In addition to the nursery, the program included a dedicated nurse station, workroom, waiting area to serve the entire Maternal Child Unit, offices, public restrooms, housekeeping, storage and upgrade to the C-Section Suite. The project had several challenges, but the most challenging was incorporating the mechanical systems, fire suppression systems, lighting and medical gases into a 1946 addition with a clearance of 8'-8" from floor to underside of structure above.

5,600 Sq. Ft. * \$421,000*

Role: Architectural, Interior and MEP
