BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT

This project involved the design of two 11,000-square-foot multi-tenant commercial buildings in Sperry, Oklahoma. Constructed with conventional steel framing, the buildings were designed to house eight tenant spaces totaling approximately 22,000 square feet. Exterior finishes consist of EIFS cladding with simulated split-face block detailing and integrated storefront systems with continuous steel canopies. Each tenant suite includes office, restroom, and support spaces, along with storefront and service access.

22,000 Sq. Ft. Cost: \$4,000,000

Role: Architectural, Interiors, Structural, Civil, Landscape & MEP
